DEMONIC BINARY

SERVICE BRIEF

NATIVE MOBILE ENGINEERING

iOS & Android Development

Build native apps. Improve what exists.

Swift, SwiftUI, Kotlin and Compose from architecture through release.

01 NATIVE CLIENT > 02 SECURE API > 03 PRODUCTION RELEASE

WHAT WE DO

- iPhone and iPad applications
- Android and tablet experiences
- Authentication and API integration
- Offline state and failure recovery
- Performance, accessibility and QA
- App Store, TestFlight & Play releases

HOW WE WORK

- Map customer flows and existing code
- Design client state and API contracts
- Implement and test on devices
- Release with monitoring and handoff

YOUR DELIVERABLES

- Native application implementation
- API, state and architecture notes
- Device and regression testing
- Release and operations documentation

THE OUTCOME

Bring product experience, security and reliability into one mobile delivery.
