DEMONIC BINARY

SERVICE BRIEF

OFFENSIVE SECURITY

Penetration Testing & Red Teaming

Find weaknesses. Ship meaningful fixes.

Authorized assessments across web, mobile, APIs, cloud, identity and networks.

01 ATTACK SURFACE > 02 POLICY BOUNDARY > 03 RETEST & FIX

WHAT WE DO

- Application & API penetration testing
- iOS/Android application assessment
- Cloud & network attack-path review
- Identity, session & authorization testing
- Adversary simulation / red teaming
- Secure code review

HOW WE WORK

- Agree scope and test accounts
- Execute non-destructive attack-path tests
- Present findings and developer corrections
- Retest fixes when included

YOUR DELIVERABLES

- Documented test plan and boundaries
- Reproducible findings and risk context
- Remediation guidance with fix owners
- Technical debrief and retest options

THE OUTCOME

Translate realistic attack paths into security and engineering decisions.
